## PROJECTS

### ● Food Delivery System

This mini e-commerce web app provides a complete food delivery system, featuring a customer-facing store for browsing products, managing a shopping cart, and placing orders with cash on delivery or Khalti payment options. An admin dashboard allows for secure login to view products and manage orders. Both the backend and frontend routes are protected using JWT authentication, ensuring secure access for authorized users.

Frontend: React Js, Tailwind CSS

Backend: Node Js, Express Js,

Database: Mongo DB (with Mongoose)

Deployment: Vercel, Render, Mongo DB Atlas, Cloudinary, ..

 [Admin](#)

## ● Doctor Appointment System

This web application facilitates patient-doctor appointments, enabling patients to book, manage, and track their consultations. The application features a responsive design, utilizes RESTful APIs for seamless frontend-backend communication, and includes robust error handling and validation. Security is prioritized through data encryption, secure password storage, and protected routes.

Frontend: React Js, Tailwind CSS

Backend: Node Js, Express Js,

Database: Mongo DB (with Mongoose)

Deployment: Vercel , Render, MongoDB Atlas,cloudinary,..
